- The installation has also created **secure websites** (using the certificate created in the SSL chapter), which will be used to manage the server and for users to access their email via the

web. Open **IIS Manager** to list these new websites.

5. Display the **Exchange Admin Center** home screen using the following address:

<https://adXX.domaineXX.local/ecp/>

6. Shutdown the VM.
7. Create a copy of this VM using **Export to Exchange2019.ova**
